

DAMAGED ELECTRICAL CABLES, WATER PIPES, TELECOM CABLES?

THE ADVANCED SOLUTION...

UTILI-FINDER⁺PLUS

- ✦ All the advantages of Utili-Finder, the unique and easiest to use buried utilities locator system that requires no experience
- ✦ Automatic multi utility detection
- ✦ Increased detection performance
- ✦ Works in a wide range of site conditions
- ✦ Depth reading
- ✦ The preferred choice for anyone digging around buildings requiring the highest de-tecton performance

UTILI-FINDER⁺PLUS

PLUG IN AND TURN ON

LOCATE AND TRACE

DEPTH

MARK THE POSITION

Utili-Finder PLUS is a unique system that is very simple to use. Utilities can be detected using the Utili-Gen signal plugged into a 13 A power socket or by selecting the AUTO mode that finds other isolated and electrically utilities carrying detectable signals

Plug in the Utili-Gen inside the building and trace the buried electricity cable and read the depth with a simple push of a button, mark the path as you go

Other utilities that are safety bonded to the electrical earth system can also be located

Select the AUTO mode and detect other isolated including metal gas and water pipes, telecom cables and distribution power cables

Knowing the location of buried cables is essential to protect personnel and equipment during any excavation project.

Damage causes unnecessary costs, creates project delay and can cause serious personal injury.
